

METHOD, SYSTEM, AND PROGRAM FOR PROVIDING USER  
LOCATION INFORMATION FOR A PERSONAL INFORMATION  
MANAGEMENT SYSTEM FROM TRANSMITTING DEVICES

ABSTRACT

5        Provided is a method, system, and program for providing user location information for a personal information management program. A plurality of records for a user of a wireless device each include at least one position coordinate and an associated time indicating a location of the wireless device at the time and the position coordinate. Records for transmitting devices each include at least one position coordinate and an associated location description providing  
10      information on the position coordinate in the records. The location description from at least one of the transmitting device records is added to at least one record associated with the user of the wireless unit.
